ROADMAP

01 INTRODUCTION

BitcoinPunkZ is a token based on the Binance Smart chain and is inspired by the well-known NFT artwork “CryptoPunk”.

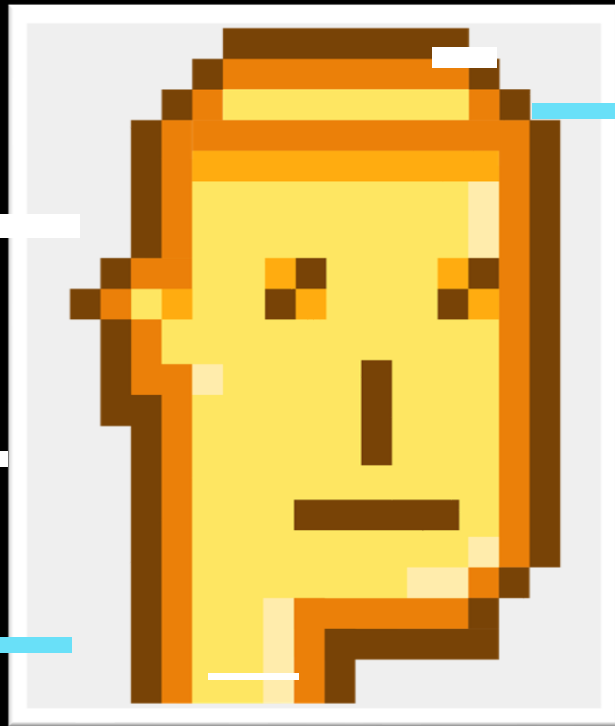

Built on the foundation of a community of multi-skilled visionaries and idea-makers, we plan to see the **BitcoinPunkZ** at the forefront of decentralized finance (DeFi) evolution, being amongst the first platforms to utilize **Anti-dump & Anti-whale Mechanism** and **Reflection Protocol** to constantly drive up the price floor, increase token liquidity and contribute to token marketing.

BitcoinPunkZ is a project that enables its holders to earn Bitcoin regularly as a source of passive income through reflection. **BitcoinPunkZ** stands somewhere between being an NFT product and an earnings token.

We might think about produce our own NFT in the future when our tokens get the attention of the crypto community.

02 OUR LOGO

Our logo is inspired by “CryptoPunk” and Bitcoin. We combine two beautiful and enourmous pieces into an unique “BitcoinPunkZ” artwork as you can see.
